

# WAREHOUSE CHECK-UP

OPTIMIZATION AND IMPROVEMENT  
OF YOUR INTERNAL LOGISTICS

LOGISTICS FOCUSED SOLUTIONS BY E+P

- Holistic view on the entire logistics chain
- Precise and practice-oriented approach and realization
- Elaboration and documentation of recommendations for action
- Knowledge transfer and provision of know-how from numerous logistics projects
- Planning and implementation support during the realization phase

## AS-IS ANALYSIS

In the first step, your logistic material flows and processes are **assessed and analyzed**. In addition, related function areas are observed. A close cooperation and the inclusion of all project and process managers is a decisive factor of success, allowing an overview of all processes from the employees' perspective.

## CONSOLIDATION OF POTENTIALS

In the next step, the results of the as-is analysis are **consolidated and summarized**. In addition, **realizable optimization potentials** are identified, developed and elaborated. This way, you obtain a comprehensive overview of the current status and the identified options as well as solutions for improvement (weak point analysis).

## EVALUATION AND CREATION OF AN ACTION CATALOG

In the last step, the **potentials are evaluated and an action catalog is elaborated**. This takes place with regards to the realization potential, the capacity and performance increase as well as the investment volume and the realization time. The action catalog lists the recognized and evaluated optimization potentials, identifies the required organizational and technical modifications and provides a detailed overview of the expected result after the optimization in summarized form. The action catalog serves as the basis for the subsequent realization projects.

As-is analysis

Development of optimization potentials

Evaluation and elaboration of an action catalog

## YOUR ADVANTAGES AT A GLANCE:

- Release of short-term saving potentials (quick wins)
- Reduction of your logistics costs thanks to efficient storage and logistics processes
- Improvement of the customer satisfaction thanks to an increase in service quality
- Improvement of the material flow and the throughput times as well as an elimination of waste
- Application of recognized methods for a continuous process improvement (e.g. lean logistics)
- Development of recommendations for action taking into consideration future-proof logistics solutions
- High acceptance by the employees whose tasks are assessed and considered
- Long-term effect of the implemented measures
- Individual consideration of your company-specific requests

We offer you our support in planning and performing the warehouse check-up and our know-how as your competent partner for the implementation – neutral and producer-independent.
