

# OTP APP – ELEVATE YOUR GROUND HANDLING EXPERIENCE

## OTP APP (ON-TIME PERFORMANCE APP) – YOUR GATEWAY TO STREAMLINED GROUND HANDLING OPERATIONS

### Revolutionize Aircraft Turnarounds

Enter the digital revolution of ground handling with our new OTP App. This innovative solution is designed to revolutionize your aircraft turnaround management, ensuring unmatched efficiency and superior SLA performance.

### Paperless Precision

Say goodbye to cumbersome paperwork and welcome in a new era of seamless digitalization. With the OTP App, you can effortlessly digitize and document every aspect of your aircraft turnaround management process. Experience the immediate benefits of a paperless future by instantly gaining a clear overview of your handling operations, enhancing your on-time performance, and significantly reducing the risk of unnecessary delays and penalties.

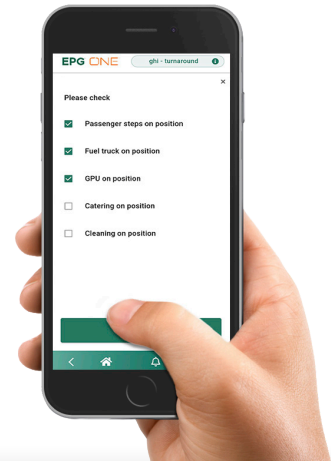

### Simplify Operations and Ensure Compliance

Our app provides turnaround coordinators and ramp agents with a simple yet highly intuitive configuration tool, putting the power in your hands. Designing task profiles and processes has never been easier, enabling you to promptly respond to internal or customer-driven changes while adhering to SLA requirements. Specify the data to capture every step of the process through our mobile application, ensuring compliance and efficiency at all times.

## Plan, coordinate, and monitor your aircraft turnaround processes for each airline in real-time, using accurate, live data

The OTP App allows you to create individual workflows, make necessary adjustments on the fly, and meticulously document your processes. Its intuitive interface offers extensive customization options, allowing for the swift creation, arrangement, and management of turnaround processes without needing to rely on external resources.

### KEY FEATURES

- ✓ **Powerful workflow designer:** Boost your on-time performance with our intuitive workflow designer, ensuring seamless operations.
- ✓ **Digitalization of job lists:** Enhance service delivery and streamline processes by making the transition from paper-based job lists to digital platforms.
- ✓ **Data consolidation:** Consolidate multiple data feeds, including schedules, Type B messaging, and airport and airline information, for comprehensive insights.
- ✓ **Optimized ground handling:** Centralize the collection of all performance indicators, optimizing your ground handling operations efficiently.
- ✓ **Time stamps and task dependencies:** Capture precise time stamps and task dependencies, ensuring accurate tracking and efficient task management.
- ✓ **Real-time flight tracking:** Track flights and access real-time flight data, allowing you to enhance service delivery based on live information.
- ✓ **Digital verifications:** Conduct real-time digital verifications and automate the transmission of PDF reports to stakeholders, ensuring transparency and accountability.
- ✓ **Offline capability:** Work offline for greater flexibility, ensuring uninterrupted operations even in challenging connectivity environments.
- ✓ **Compatibility:** Seamless integration with industry-standard systems, enhancing collaboration and interoperability across platforms.
