

CnB – Contract and Billing 4 from EPG Achieves SAP Certification as Integrated with SAP S/4HANA®

Ehrhardt Partner Group (EPG) today announced that its interface software for the product CnB – Contract and Billing 4, a solution for managing contracts and invoices, has achieved SAP certification as integrated with SAP S/4HANA®. The integration helps customers to streamline implementation of CnB into their existing SAP environment.

With standardized iDoc interfaces, EPG can offer customers a modern method of software implementation with reduced downtime. Once integrated, CnB manages the contracts, documents all services performed for a client, creates an invoice based on the agreed contract and invoices the client directly, while the same information is transferred to SAP HANA® for accounting.

The [SAP® Integration and Certification Center](#) (SAP ICC) has certified that the interface software for the product CnB – Contract and Billing 4 integrates with SAP S/4HANA using standard integration technologies. SAP S/4HANA is a future-ready ERP system, with built-in intelligent technologies, that transforms business processes with intelligent automation and runs on SAP HANA – a market-leading in-memory database that offers real-time processing speeds and a dramatically simplified data model.

"It is a great success for us as EPG to have our interface software for the product CnB – Contract and Billing 4 SAP-certified as integrated with SAP S/4HANA," said Ingo Richter, managing director of EPG. "The possibility to interoperate with SAP S/4HANA is the next step towards end-to-end digitalization and automation of the logistics process."

With CnB, Ehrhardt Partner Group provides a complete solution for the digital contract and billing management of all logistics services. CnB helps ensure that all services within the agreed contracts are billed quickly and completely at the right price. CnB also documents and invoices reliably for services provided beyond the scope of the original contract. Invoice verification by the customer is then carried out time-efficiently in the customer web portal. Time-consuming credit notes or cancellation processes can be

eliminated. The verification process is significantly shortened, allowing invoices to be paid more quickly. With integration into SAP S/4HANA, customers no longer have to make time-consuming and cost-intensive process adjustments.
